

RFT, July 13, 2012:
Checked and
Corrected.

AT 159
7 JULY 2011
ANIELLA NENJO

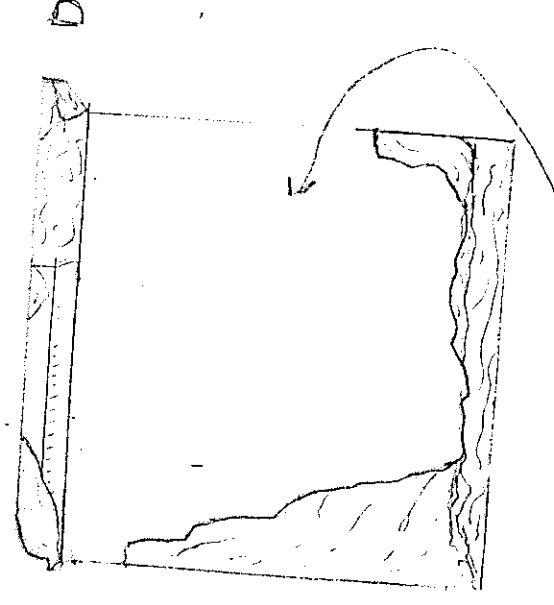

Photo and sketch
made in 2007 of
underside show
no cutting for
saw or other
diagnostic features.

front
left

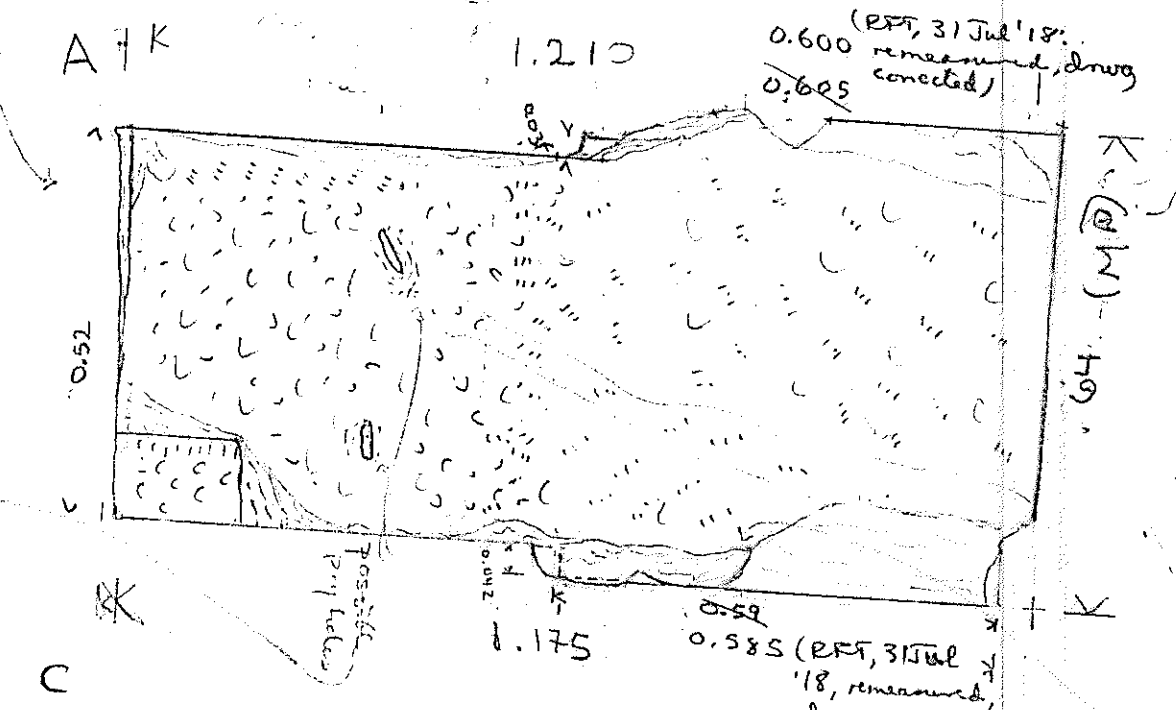

RFT, 16-Jul-2015:
Analogous find
in 2007 was from
the same site
- cutting surface
of a tooth, but
it is smooth.

RFT, 10 Dec 2020:
This is not "P.P." - the
dimension is fully forward.
The only measurement made
0.61m, Annelia has drawn
it as 0.6m. I have not
changed the drawing.

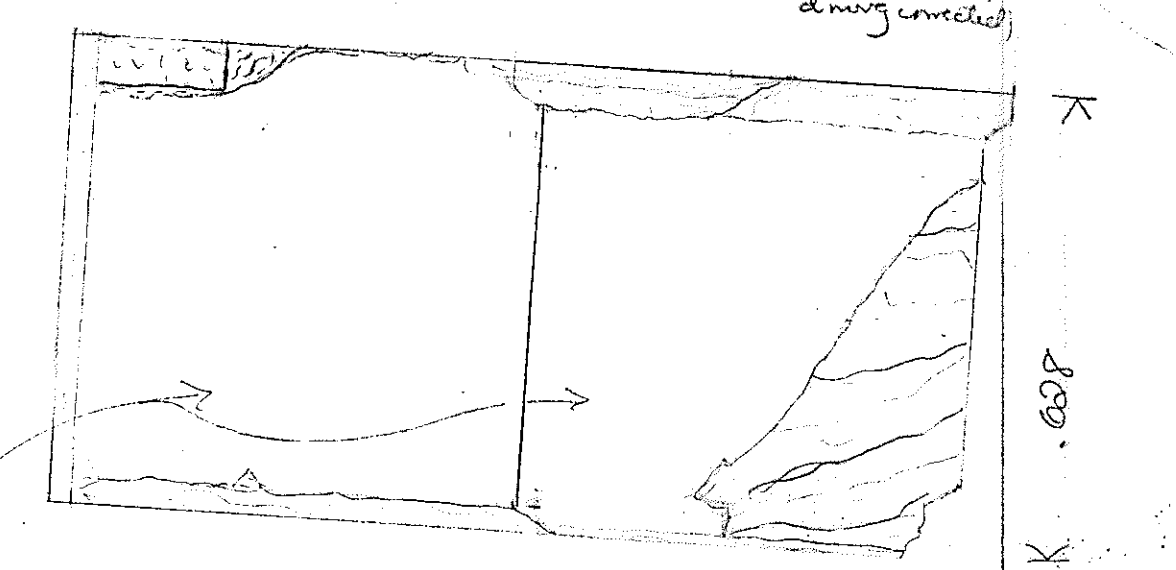

RFT, 16-Jul-2015:
Continuation of tooth-disk
and point over forward
portion changing to point
only ca 0.10m. behind
offset

RFT, July 13, 2012:
Confirmed ear
pry holes. There
is even likely to
be a third between
the two known, but
I have not added it.

RFT, Nov 5, 2011:
Hunts, these are
definitely pry
holes.

RFT Nov 5, 2011:
This line should be
not be added. See
of Rite. It is a break
line.
